

Snow & Light Material Bucket

Some common uses: Snow and Light Material Handling

Part # SLMB-(width) Example: SLMB-60 is a 60" Snow and Light Material Bucket

SLMB-Series

When you need a bucket to move snow and other light materials, Berlon's ***Snow & Light Material Buckets*** are the buckets that last. They are made to suit everyone's application with a variety of widths and mounts to fit most skidloaders.

1/2" X 6" X 6" High Cutting Edge Sides for Reinforced Corners & a Heavier Metal Wear Strip for Scraping Along Curbs.

Berlon's ***Snow & Light Material Buckets*** feature a fully welded body, 2 heavy duty steps, 1/2" x 6" cutting edge with holes, wear bars and a radius kick-out plate for easier clean out and maximum strength. A reinforcement tube is also part of the design, to provide excellent rigidity and strength. All SLMB-Series buckets come standard with a MPUF-1 mounting plate and powder painted black. All these features show that ***Berlon builds buckets the way they should be built!***
